## OBJECTIVES

The study of historical landscapes has been radically renewed through new theoretical-methodological perspectives including the introduction of increasingly sophisticated investigative techniques.

Within the context of a more general research program concerning the area between the Alps and the Adriatic islands (IRAAHL), the object of this Summer School is to learn how to use all available sources to study the dynamics of landscapes through time in order to reconstruct their environmental, social and economic evolution.

This Summer School, which is intended as a kind of on-going inter- and trans-disciplinary encounter between scholars from various European nations, will present the most innovative aspects of current research on Historical Landscapes. The aim is to provide students at Degree, Masters and PhD level, young researchers and professionals with an opportunity for high-level theoretical and practical training, in line with the most innovative European research and its practical application in fieldwork.

## LECTURERS:

- G. P. Brogiolo (University of Padua, Italy)
- R. Brigand (University of Besançon, France)
- S. Burri (Université François Rabelais de Tours, France)
- K. Challis (University of York, UK)
- C. Citter (University of Siena, Italy)
- A. De Guio (University of Padua, Italy)
- G. Fiorentino (University of Salento, Italy)
- R. Langohr (Ghent University, Belgium)
- J. M. Martin Civantos (University of Granada, Spain)
- M. Nebbia (Durham University, UK)
- C. Nicosia (Université Libre de Bruxelles, Belgium)
- D. Powlesland (Landscape Research Centre, North Yorkshire)
- A. Reynolds (London's Global University, UK)
